

1. MEMORANDUM FOR THE CHIEF

19 FEB 1982

MEMORANDUM FOR: Chief, Plans and Programs Staff, OL

FROM:

Chief, Supply Division, OL

STAT

SUBJECT: Support Resource Package

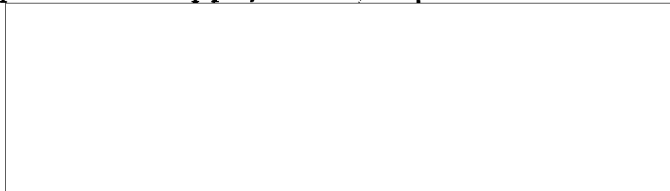

REFERENCE: Memo fm C/P&PS/OL to Mltip Adse dtd 17 Feb 82,
Same Subj (OL 2 0716)

A personnel increase of the size reflected in the Support Resource Package should not significantly impact on administrative support routinely provided by Supply Division. Having stated the above, we offer the following scenarios and their possible administrative impact:

a. On the assumption the personnel increases will be widely dispersed throughout an individual Directorate, we envision no significant impact and conversely should not require additional Supply Division slots. There would be requirements for routine administrative supplies and equipment; however, the impact would reflect on the Directorate Logistics element responsible for providing support and not directly on Supply Division.

b. On the assumption the personnel increases would be concentrated or dedicated to a specific project requiring specialized support, it is probable Supply Division would be tasked to perform services beyond our present capabilities. An example in point would be a Task Force similar to NE and LA Divisions necessitating a senior Logistics Officer detailed as the project support coordinator.

c. On the assumption that personnel increases will require construction or acquisition of a new building, Supply Division's current staffing complement is not sufficient to provide Logistics officers for new components. We would propose at least one logistics careerist be assigned to satisfy the requirements of a newly established self-contained element. Our exposure to various Headquarters components requesting assistance, reveals the need for professional logistics officers in their present configuration. The added element of additional personnel further highlights this need; STAT however, should have little impact on Supply Division until this need is recognized.
